

USAID KHAN

Backend Developer

+91 8291223398 @ kusaid888@gmail.com Mumbai, India

SUMMARY

I am an entry-level Backend Developer with a keen interest in creating efficient backend systems using Node.js, Express.js, and MongoDB. My focus is on writing clean and maintainable code while solving real-world problems. I am actively seeking a Backend Developer Internship or Junior Backend role to leverage my skills and contribute to impactful projects

EDUCATION

B.Sc. Computer Science (Data Science)

Abeda Inamdar Senior College

08/2022 - 03/2026 Pune, India

PROJECTS

Food Delivery Backend System — Node.js | Express | MongoDB | JWT | Render

A backend system for food delivery services

- Built backend for authentication, cart, product catalog, and order management
- Implemented secure JWT authentication, password hashing, and user roles
- Designed optimized MongoDB schemas and REST APIs
- Deployed backend on Render

Todo Management App — Node.js | Express | MongoDB

An application for managing to-do tasks

- Created CRUD system for users and tasks
- Designed structured routes, validation, and error-handling middleware

Weather Forecast App — HTML | CSS | JavaScript | API

A weather forecasting app showcasing real-time weather data

- Built weather tool using OpenWeather API
- Added search, dynamic UI updates, and validation

SKILLS

GitHub	Node.js	Express.js	MongoDB	REST	JavaScript	ES6+	Mongoose	JWT
Middleware	Git	Postman	MVC	HTML	CSS	Fast Learner	ATS	Javascript ES6

KEY ACHIEVEMENTS

Achievements

Built and deployed multiple backend projects

MongoDB Atlas Certification –MongoDB University

- Hands-on experience with clusters, indexing, performance & cloud deployment
- Experience with monitoring, backups & optimization

STRENGTHS

Strong backend fundamentals

Effective debugging skills

Fast learner and problem solver

Team collaboration and adaptability
